

What is claimed is:

1. A method of cooperation service with attraction and seeing and listening of contents comprising: taking a park image to which a customer during attraction use is related; capturing the taken park image into a receiver; and inserting the park image into contents related to the attraction, the contents being supplied for seeing and listening by using the receiver.

2. A method of cooperation service with attraction and seeing and listening of contents comprising: taking a park image to which a customer during attraction use is related; recording the taken park image onto a portable recording medium; reading the park image recorded onto the portable recording medium to capture the park image into a receiver; and inserting the park image into contents related to said attraction, the contents being supplied for seeing and listening by using the receiver.

3. A portable recording medium used in the method of cooperation service with attraction and seeing and listening of contents of claim 2, wherein a taken park image to which a customer during attraction use is related is recorded.

4. A method of cooperation service with attraction and seeing and listening of contents comprising the steps of: taking a park image to which a customer during attraction use is related; transmitting the taken park image to a broadcaster; delivering the received park image and contents related to said attraction from the broadcaster; receiving the delivered park image and

the delivered contents by a receiver; and inserting the received park image into the contents that are supplied for seeing and listening by using the receiver, wherein the park image has a customer ID identified with a customer ID (identifier) possessed by the receiver.

5 5. A method of cooperation service with attraction and seeing and listening of contents comprising: recording an attraction use history of a customer onto a portable recording medium; reading the attraction use history recorded onto the portable recording medium by a receiver; and supplying to said customer a privilege service corresponding to the attraction use history when seeing and listening to contents related to said attraction, the contents being supplied for seeing and listening by using the receiver.

10 6. An attraction system for executing an attraction used in the method of cooperation service with attraction and seeing and listening of contents of claim 5, comprising: at least an information writer which records an attraction use history of a customer onto a portable recording medium.
